Annotated bibliographic list of literature on the topic "Methods of teaching in universities"

По ключевым словам: «Teaching Methodology», «Teaching methods», «Teaching methods at the university», «Innovative technologies in education», «Methodological competence of the teacher», «Didactic competence of the teacher»

Databases: Scopus, Web of Science

Range: 2020 to 2025

Quantity: at least 10 articles

Article	title	Author (s)	Brief abstract, link to the source
1.	Design and Implementation of Data Analysis and Decision-Making Mechanism System for Teaching Quality of Private Application-Oriented Undergraduate Education in The Era of Big Data (SAMPLE!!!)	Zhiqing, B. (2023) (SAMPLE!!!)	Private educational institutions that focus on applied learning through undergraduate programs occupy an important place among higher education institutions in China. The vast resources of educational data accumulated over the years of their operation represent both challenges and opportunities for improving the quality of education in these institutions. Integration of business intelligence technologies with the information infrastructure of private educational institutions of applied orientation, as well as the use of big data analysis and processing methods, contribute not only to improving the quality of training, but also to scientifically based management decision-making. https://dl.acm.org/doi/pdf/10.1145/3660043.3660239://dl.acm.org/doi/pdf/10.1145/3660043.3660239 (SAMPLE!!!)
